1 Task Description

1.1 Short Description - Task Objectives and Scope

The Task 43 extension aims at facilitating cross-border trading of solar thermal quality products by reducing testing and certification efforts and costs through the harmonization of requirements for testing and certification.

The scope is test procedures and standardization for solar thermal systems and components - and certification of solar thermal collectors.

1.2 Subtasks and their Lead countries

The task is divided into three subtasks:

- Subtask A: Harmonization of standards for solar thermal products (AU)
- Subtask B: Harmonization of certification schemes for solar collectors (US)
- Subtask C: Organizational framework for global collector certification (DE)

1.3 Main Deliverables

- The main deliverables will be:
- Support to ISO standardisation
- Rules/requirements for global collector certification
- Establishment of a "Global Solar Certification Network"

1.4 Duration

The Task 43 extension is running 2 years, from the July 2013 till June 2015.

The general objectives of Subtask A is to give support to:

- Promotion of the new ISO/EN 9806 for collector testing
- ISO TC 180 work on harmonizing standards for solar thermal systems and components on a global scale.

Work done so far:

- Updating of work plan for subtask A according to outcome of first expert meeting 30 September 2013

2.2.2 Subtask B Harmonization of certification schemes

The objective of subtask B is to define the set of requirements national/regional certification schemes shall fulfil in order to be accepted under the global "umbrella" certification scheme for collectors.

Work done so far:

- Updating of work plan for subtask B according to outcome of first expert meeting 30 September 2013.
- Initial "discussion document" on rules/requirements made.
- Discussion on the above document at workshop and first expert meeting 30 September 2013.

2.2.3 Subtask C Organizational framework for global collector certification

The objective of subtask C is to set up rules for the organizational framework for the global certification of solar collectors. This includes defining the structure of framework/network, deciding who can/shall participate in the framework/network, defining voting rights, setting meeting frequencies, setting fees – and establishing the Global Solar Certification Network.

Work done so far:

- Updating of work plan for subtask C according to outcome of first expert meeting 30 September 2013.
- First draft of "Internal Working Rules" made.
- Discussion on the above document at workshop and first expert meeting 30 September 2013.
- Informal Global Solar Certification Network Established:
Chair: H. Drück, Deputy chair: L. Nelson, treasurer: E. Prado, secretary: J.E. Nielsen
