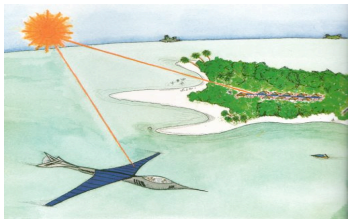
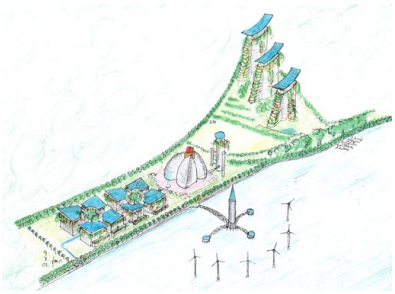
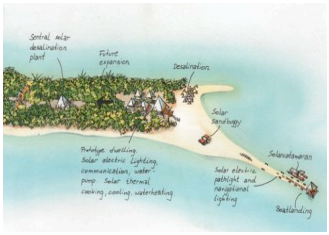
INVITATION TO A SPECIAL SESSION AT EVER ’11 IN MONACO

TEA ?

Towards Energy Autonomy ?







Drawings: Sivilarkitekt Harald N. Røstvik AS

At EVER ’11 in March 31st – April 3rd 2011 (http://conference.evermonaco.com), we plan to organize a half or full day special session dealing with the very exciting trends now visible towards designing zero energy or autonomous technology, based on highly energy efficient solutions coupled with the use of renewable energy.

The session could cover the full scope from broad scale solutions like the project for a possible new European Super Electricity Grid connecting Europe, North Africa and the Middle East, Energy Autonomous Nations and Cities to “components” like;

Energy Autonomous Buildings
Energy Autonomous Industry & leisure projects
Energy Autonomous Boats
Energy Autonomous Planes
Energy Autonomous Road Vehicles

The objective is to get an idea of what is “moving” out there in terms of ideas and visions that might become realistic alternatives in the near future, if approached systematically.
We hereby invite interested parties to contact the undersigned regarding possible projects to be presented, ideas and sponsorship for the special session. Targeted audience is architects, designers, engineers, researchers, students, visionaries and decision makers.
First of all we just want a quarter to a half page describing projects, built, planned or envisaged.

The deadline for sending such a description is November 30th 2010.

Welcome to Monaco in 2011 !
