The Task work is divided into five subtasks:

- **Subtask A**: Cooperation with ongoing or upcoming SHC Tasks and related Tasks from other programs
- **Subtask B**: Methodology adaption
- **Subtask C**: Data of different technologies and components (Identify, compile, and analyze existing inventories and other input data for Life Cycle Assessment and costing for SHC technologies and components)
- **Subtask D**: Reference systems and their requirements, scenarios, and optimization
- **Subtask E**: Dissemination, networking, and policy involvement
